Measuring Guide

1. Choose your Bill Beaumont Textiles fabric and colour

2. Choose your lining (all linings are ivory in colour)

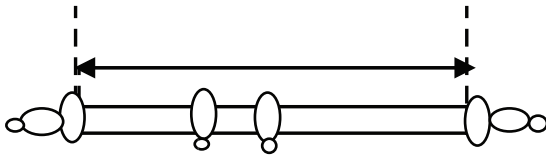

- Unlined (price as quoted less 10%)
- Standard (price as quoted)
- Blackout (price as quoted plus 10%)

- Thermal (price as quoted plus 5%)
- Luxury sateen (price as quoted plus 5%)
- Machine interlined (price as quoted plus 10% - 15 day service)

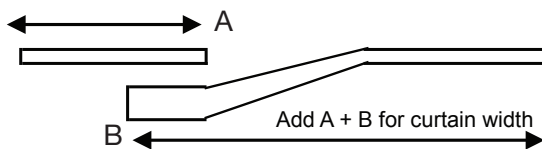

3. Choose your heading type:

- Pencil pleat - Made with a 3 inch heading tape and are made to double fullness, to give a luxurious gathered look.
- Pinch pleat - Triple 4inch pinch pleats, made to double fullness. The curtains arrive ready to hang.
- Tab tops - Made to 1.5 times the width of the window. Tabs measure 10cms deep and are 5cm wide. There are 8 tabs in a width.
- Eyelets - We offer a choice of six colours for our 40mm metal rings (50mm rings available) and we use double fullness for our eyelet curtains. There are 8 eyelets to a width. We will add approximately 30mm of fabric above the eyelet.

4. Measure the width of the pole or track between any decorative finials:

- If you are using an overlapping track, add the overlap (B) onto (A) to give your total curtain width

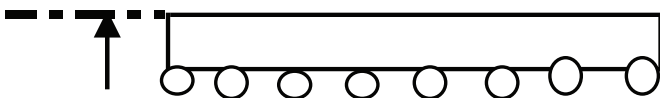

5. Calculate the number of widths of fabric required using the following table (this is required to calculate the price. Alternatively, send us the measurements and we will process the order accordingly). When ordering pinch pleats send us the track/pole width, as we make allowances for spring back and overlap, and if there are any returns let us know how many and their size.

	1 width	1.5 widths	2 widths	2.5 widths	3 widths
Pencil	< 140cm	141-200cm	201-280cm	281-340cm	341-400cm
Pinch	< 122cm	123-183cm	184-244cm	245-305cm	306-366cm

Eyelet	< 140cm	141-200cm	201-280cm	281-340cm	341-400cm

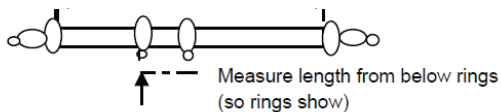

- We can make curtains outside of these measurements. Please contact our office for prices.

6. Measure the drop to your preferred finishing length (i.e. Sill or floor):

- For tracks, measure from the top of the track

- When measuring for curtains that are to be fitted to a curtain pole, the measurement needs to be taken from the underside of the pole rings

- When measuring for eyelet curtains, measure from the top of the pole to the required finished length

7. Work out the price from the retail or trade price list using the selected fabric's price band and send us the order

Roman Blinds

It's the law...

In early 2014 the standards regarding the manufacture, supply and professional installation of internal window blinds changed significantly. It is now illegal to supply or professionally install an internal window blind which does not comply with the child safety requirements of BS EN 13120:2009+A1:2014

Mandatory Requirements

The new standard aims to protect babies and small children by:

- ✓ Installation of child safe blinds to ALL HOMES whether children are present or not
- ✓ Limitations on cord and chain lengths (see instructions below)
- ✓ Safety devices for preventing any cords or chains from creating a hazardous loop
- ✓ The fitting of safety devices on cords and chains at the point of manufacture
- ✓ The testing of all safety critical components of internal blinds
- ✓ Safety warnings and product instructions

Our Blinds are 'safe by design' and as such are deemed to be fully compliant with this new standard above, and as such all hazardous cords, chains and loops must be removed or made safe.

The important point of calculation now becomes the installation height of the blind or track, this determines how long the chain or cord can be. The bottom loop of the chain or cord must be 150cms from the floor and secured with a compliant safety device, without the safety device the product is not compliant and should not be fitted.

Any professional installer of internal blinds must fit safety devices - by law

Advice is given from the Make It Safe campaign and is supported by

The Royal Society for the Prevention of Accidents

Product Information

All our standard curtains and blinds are made in 10 working days from the date of order, all other items carry a 15+ working day make up service.

CURTAINS

ALL CURTAINS WILL BE MADE AS STANDARD LINED AND TO THE FOLLOWING SPECIFICATION UNLESS OTHERWISE STATED IN YOUR ORDER.

Seams 7.5 cms approx. Blind stitch bottom hem. Blind stitched sides on unlined curtains. Mitred corners. 3" woven pocket tape as standard. Any diversion from standard make-up will be charged at an additional 20% surcharge and may incur a delay in manufacture.

If any size above the listed sizes is required then a pro rata of the nearest 1 width drop will be charged eg. 1 pair lined 4w x 300 cms drop charged as follows:

1w x 274cms = £63.57 divided by 274 = 0.232 x 300 = 69.60 x 4 = £278.40. If longer drops are required pro rata the bottom price e.g 1 pair lined 1 w x 350 cms drop charged as follows £63.57 divided by 274 x 350 = £81.20

Widths to be full or 1/2 width, when requesting 1/2 widths please state which side of curtain the 1/2 width is required.

If ordering a single curtain containing a half width you will be charged to the nearest whole.

PINCH PLEAT CURTAINS

Pinch pleats are made as standard 4" triple pleats, and are also available in 5" and 6" and double pleat. Standard pleats are fitted with 5 strong plastic adjustable height pin hooks per width. Average finished width per curtain when pleated is 60cm We recommend the use of a pole not a track to ensure the pleats hang correctly.

EYELET CURTAINS

Eyelet curtains are made with a standard 40mm ring. 50 mm are available on request with a surcharge £14 per width. Eyelets are available in Satin Silver, Chrome, Antique Copper, Old Gold, Brass and Gunmetal.

TAB TOPS

Tab top curtains we recommend 1.5 times fullness. Tabs measure 10 cms deep and are 5 cms wide with 8 tabs in a width. We recommend you attach your pole 15cm above the window to minimise light exposure.

PANELLED CURTAINS

Panelled curtains are available at a surcharge of £5.00 per panel per width. Panels can be selected from any of our plain fabrics and can be manufactured to customer requirements. 1/2 Width single panelled curtain will be charged to the nearest whole. Please quote panel width (s) and required position (s) when ordering.

VALANCES & PELMETS

Valances are fitted with 7.5cm header tape, and are also available as a pinch pleat. If Velcro is required an extra cost of £3 per width is applied. Pelmet are supplied with velcro stitched to the inner edge which attaches to the customer's pelmet board.

ROMAN BLINDS

Roman blinds are available in any suitable fabric from our range. The blinds will be supplied with track and fixing brackets ready to hang. All blinds will be made lined. Please note blinds made with a blackout lining are not total blackout blinds, as stitch holes will still show light through. Please note there is a jump in

price for all blinds required above 127cms, this is because 2 widths of fabric is required to make a blind above 127cms and there is no exception to this price bracket. The standard blind comes on a cord operating system however, due to the safety law regulations only the smallest of blinds can now be made with this system, larger blinds must be made with a chain system. This is reflected in the pricing on Pages 6-14.. Chain systems are also available which is on a standard control unit with a 1:2 ratio (fast lift) but is only suitable for blinds up to approx 180 cms wide. If the blind is wider than 180 cms we will use the unit with a 1:4 ratio.

The total maximum width of a Roman Blind Cord is 127cms, and the total maximum width of a Roman Blind Chain is 250cms, due to the weight of the fabric and the safety break system.

Because of the 2014 safety law on the manufacture of blinds, we must be provided with the installation height of the blind in writing from yourselves, without this a blind cannot be manufactured. See Roman Blinds "it's the law" (p4)

PLEASE PROVIDE EXACT WIDTH, DROP AND INSTALL HEIGHT FOR ALL BLINDS IN CM'S

CUSHIONS

Available up to 24" (61cm) Standard size 18" - sizes above will be charged at an additional 90p per inch. Piping in a different fabric is 75p extra per cushion. Bolster cushions can be made, price on request. Please note: All zips will be supplied in either beige or black, if you do require an exact colour match you can supply the zip, which will be fitted within the same price.

SHRINKAGE, FADING & TOLERANCES. We will endeavor to make curtains to your exact requirements, however, we will not replace the order if the sizes are within our acceptable tolerance limit of +/-2cms on curtain makeup, and +/-1 cm on blinds and other make up, and you will not be entitled to reject the goods. Atmospheric shrinkage usually occurs to all fabrics, depending on changing temperature and humidity. Please allow up to 5% atmospheric shrinkage which usually occurs to all fabrics, depending on changing temperature and humidity. We recommend all curtains are lined to reduce the effect from direct sunlight as all fabrics eventually fade and some degradation may occur over a period of time, due to atmospheric conditions. Please note this is not a fault of the fabric.

ORDERING No order will be input into work unless a written order is received which is a legal binding contract, and as such you are not entitled to cancel the order once placed.

RETURNS PROCEDURE Please contact the sales office who will arrange collection. No goods can be returned without prior agreement. If goods are returned and no fault is found or agreed, a minimum £25 returns fee will be applied for delivery and collection.
